

# TELEGROW PROJECT

Enhancing the Teleworking  
Digital Skills for the Middle aged  
employees

## THE LAST SIX MONTH OVERVIEW

Over the last six months, on 01/28/22, 03/29/22 and 05/18/22, the TeleGrow partnership had three opportunities for meetings - the first two virtually and the third organized in Larissa (Greece) - to discuss the products already made and the planning of the subsequent work phases, as well as the strengthening of collaborative relationships between the partners.

The project is progressing very well, with no significant problems or delays, and all the outputs announced by the time schedule have been promptly delivered within the set deadlines.

In fact, all the activities related to the tasks IO1: Telegrow Interactive Report and IO2: How to stay gOLD guide have now been successfully completed and are accessible both on the official website of the project, as well as on all social media connected to the TELEGROW project. All the translated versions of the different languages of the Partners involved are also available online.

REPORT [HERE!](#)**

## IO2, IO3, IO4 STATE OF ART

"How to Stay gold Training Guide" is a digital soft skills guide on work-life balance and a modular training tool with transversal skills applied in telework contexts focused on maintaining the balance between personal and professional life. The guide is divided into 5 chapters, each relating to a soft skill. Each chapter is built following the logic of a learning path with tips, methods and examples/good practices on how VET students and especially employers over the age of 50 will maintain a balance between extremely demanding working conditions and stressful people and their personal life and consequent responsibilities.

The third activity foreseen in the time schedule, which began last February and that is still in progress, is "IO3: How to TeleGrow Old Training Modules". The first draft of the work was presented, with the contribution of all the participants, during the Larissa meeting last May. Each partner was assigned the task of creating a chapter of this vademecum.

To complete the Modules, the "Trainers Notes Booklet" (a tool that will be used to support the next LTTA scheduled for September in Greece). was also presented and submitted for judgment by the Partners.

As regards the IO4 "TeleGrow Hub e-learning", during the meeting in Larissa Partners began to discuss the activities that will be carried out and developed in the coming months.

## DISSEMINATION

To complete the dissemination activities, the project video created by Euronet and already published in recent months, will be translated by each partner into their own national languages and disseminated on their own accounts. On the official website of the project and on the Facebook page dedicated to the project, constantly updated by the partners who also update their institutional sites or social pages, you can find all the activities, results and useful and relevant news.

## TELEGROW LEARNING, TEACHING & TRAINING ACTIVITY

The next partnership appointment is scheduled online on the 8th of July. On this occasion, all the details of the upcoming LTTA to be implemented on September 2022, will be discussed. In this event each partner is invited to attend with 3 participants: 1 Staff member, 1 VET trainer, 1 VET learner 50+.

The TeleGrow LTTA is an essential part of the project and it has as an aim to bring together the working teams of the partner organizations in order to maximize their learning impact and better prepare the VET Trainers and staff members of the partner organizations for the upcoming development of the intellectual outputs
