

TELEGROW PROJECT

Enhancing the Teleworking
Digital Skills for the Middle aged
employees

THE LAST TPM

On February 7 and 8, organized by the Spanish Partner Markeut Skills S.L., in the premises of the FLORIDA Training Center, the 4th Transnational meeting of the Telegrow, which has now come to the end, was held in beautiful Valencia.

The six project partners, representing five European countries, once again had the opportunity to meet each other, consolidate friendly relations and compare notes on the quality and quantity of the work done, focusing on the last works to be completed which mainly concern IO4: Telegrow Hub e-learning: Inclusive Platform which can be accessed upon registration. This e-learning platform which can be consulted and downloaded from the project website is totally free and is available to 50+ students and trainers.

THE MULTIPLIER EVENTS

During Valencia meeting were also discussed multiplier events for dissemination and final dissemination of project results. Some partners, in fact, decided to hold Multiplier events after the Valencia meeting in order to present all the projects outputs finalized.

Until now some partners, such as Euro-Net, Florida and E-Seniors, already had their ME which gained a good attention and evaluation from the participants. The events also had more participants then the foreseen by the project results, so we can consider it a big goal reached.

The rest will be done by the end of the month.

THE CONCLUSION

In conclusion, the Telegrow project was definitely a great opportunity to give people over 50, who in many cases find themselves cut off from work settings, to acquire new skills or strengthen them just to have an extra chance in life.

Telegrow partners were very proud and satisfied with the work completed in the most professional and thorough manner.
